

Out of Network Billing Policy

Understand Your Rights Against Surprise Medical Bills

The purpose of this document is to let you know about your protection from unexpected or “surprise” medical bills.

If your health plan network does not have a contract with SPOP and you choose to receive services from SPOP, you may be fully responsible for all fees.

Before you enroll in treatment, you will be required to sign a form where you relinquish your federal consumer protections and agree to pay for out-of-network care. That form will outline the costs of services.

You may wish to contact your health plan to find an in-network provider or facility. If there is not one, then your health plan might work out an agreement with SPOP.
